

A Selection of Papers from Info II, the Second International Conference on Information Sciences and Systems, University of Patras, Greece, July 9-14, 1979: Volume 1: Advances in Communications Volume 2: Advances in Control

By -

Springer. Hardcover. Book Condition: New. Hardcover. 520 pages. Dimensions: 9.3in. x 6.5in. x 1.4in. The technical program of the Conference consisted of technical sessions that covered all-important aspects of control, information processing, communications, and computers. In particular, there were numerous technical sessions covering all-important aspects of control, such as control theory, control applications, estimation, identification, adaptive systems, linear systems, stability, cybernetics, computational methods, and simulation. The program also included many sessions on information processing, communications, such as information theory, coding, signal analysis, signal processing, communication theory, satellite communications, pattern recognition and image processing. Moreover, there were several sessions on computers, in particular on computer systems, computer communication networks, and automata. Finally, the technical program included numerous sessions on important applications of systems technology, such as power, energy modeling and planning, earth resources, transportation, economics and management, and physiological systems. In view of the broad scope of the Conference technical program and the extensive coverage of many important aspects of systems theory and

Reviews

This book could be worthy of a read through, and a lot better than other. It can be full of knowledge and wisdom I am just happy to tell you that here is the best book we have read through inside my personal lifestyle and could be the finest pdf for ever.

-- Miss Concepcion Gusikowski DDS

Complete guideline for publication fans. I am quite late in start reading this one, but better than never. It is extremely difficult to leave it before concluding, once you begin to read the book.
